Subject: BIEE event

Keith

Richard Mayson asked me to contact you regarding the event organised below by the British Institute of Energy Economics.

The role of nuclear seems to feature prominently as well as the presence of a number of nuclear-sceptics.

Our position in BNFL is that we shouldnt be involved in the event and we certainly dont wish to get dragged into it -especially noting the presence of journalists and the potential heavy bias against nuclear.

However I understand the NiA are members of the BIEE and we were interested in your position on this event?

If you wish to give me a call, happy to discuss on the phone (07712-937382)

Regards

Paul Howarth
Head of Group Science Strategy
