Subject: Nuclear Industry safety record - fatalities 

Simon,

Suspect it's not your patch, but I wondered if you know if NIA had figures on fatality rates in the UK nuclear industry over past 5 or 10 years.

We're doing a note to compare with other industry sectors, and are struggling to get info from the nuclear companies to compare. I guess it would not be from all your members - as many have substantial non-nuclear interests too - but I'd imagine we'd combine say BNFL, BE, UKAEA, and AWE to get a meaningful figure.

Anything you have that might help? (I wondered if there was anything in the "factbook" files which I know you did a couple of years back?)

Adrian
