Dear John

It was most kind of you to reply to my recent letter on the joint FAO/WHO document on carbohydrates. I now get the picture very clearly and it is a sad reflection of the way science is pushed aside by commercial interests. I shall look forward to seeing a copy of the document when eventually it is published. I thank you from the dental community in trying to ensure that the voice of reason is heard.

John Mathers certainly intends to invite you up to Newcastle in the Autumn and I hope very much that you will be able to come, and I look forward to seeing you then.

Again with very great thanks and best wishes

Yours sincerely

A J Rugg-Gunn
